Education Initiatives  
Tulane University  
200 Broadway Street, Suite 108  
New Orleans, Louisiana 70118  
504-274-3690  
<http://education.tulane.edu>

The Scott S. Cowen Institute for Public Education Initiatives at Tulane University launched the NOLA by the Numbers series in October 2010. This series aims to provide journalists, policymakers, community leaders, and the public with a timely and comprehensive analysis of state-released data on public schools in New Orleans. This report, the second in the series, focuses on school enrollment and demographics. This briefing, and others released by the Cowen Institute at Tulane University in the past, can be found at <http://education.tulane.edu>.

Each school year, the Louisiana Department of Education conducts two student enrollment counts: on October 1<sup>st</sup> and February 1<sup>st</sup>. These counts also document the race, sex, grade level, and free and reduced lunch eligibility status of students. The enrollment counts are particularly important because they are used to determine the amount of funding schools and districts receive from the state. The data used in this report was released by the state Department of Education on December 3, 2010 and can be accessed at <http://www.louisianaschools.net/lde/pair/1489.html>.

The October 2010 enrollment and demographic data shows that public schools in New Orleans are generally continuing along in their post-Katrina trajectory. Overall enrollment continues to increase, though at a progressively slower rate. Total enrollment is just over half what it was a decade ago and is nearly two-thirds what it was in the year just prior to Hurricane Katrina. The percentage of students attending charter schools continues its steady rise, outpacing any other city or district in the nation and nearly doubling the next city with a large percentage (District of Columbia, 38 percent). The proportion of low-income students attending public schools in New Orleans remains about the same as last year and continues to be significantly higher than the state of Louisiana and the nation. As seen in previous years, both low-income and minority populations continue to vary by school type.

## Fast Facts

- **39,877** students are enrolled in public schools in New Orleans, an increase of 5% from last year.
- **92** public schools are currently open in the city.
- **71%** of students in public schools attend charter schools, more than any other city or district in the nation.
- **84%** of students in public schools qualify for free or reduced-price lunch, compared to the state average of 66%.
- **89%** of students in public schools are African-American, while **6%** are white and **6%** are another race or ethnicity.

*The Scott S. Cowen Institute for Public Education Initiatives at Tulane University is an action-oriented think tank that creates and advances solutions to the issues impeding student achievement in New Orleans and beyond. Areas of concentration include Applied Research, Public Policy, University-Based Initiatives, and College Readiness Programs. Additional information can be found online at <http://education.tulane.edu>.*

## Total Public School Enrollment

Student enrollment in New Orleans today has grown continuously since public schools reopened after Hurricane Katrina, though the rate of growth continues to slow each year. From October 2009 to October 2010, enrollment in all public schools in Orleans Parish grew from 38,051 to 39,877 or 4.8 percent. This was less than the 5.5 percent gain seen from October 2008 to October 2009 and the 10.6 percent gain from 2007-2008. Today's enrollment is just over half the 78,000 it was a decade ago and is nearly two-thirds the 65,000 it was in the year prior to Katrina. The graph below shows total public school enrollment by school type for October 2006-2010.

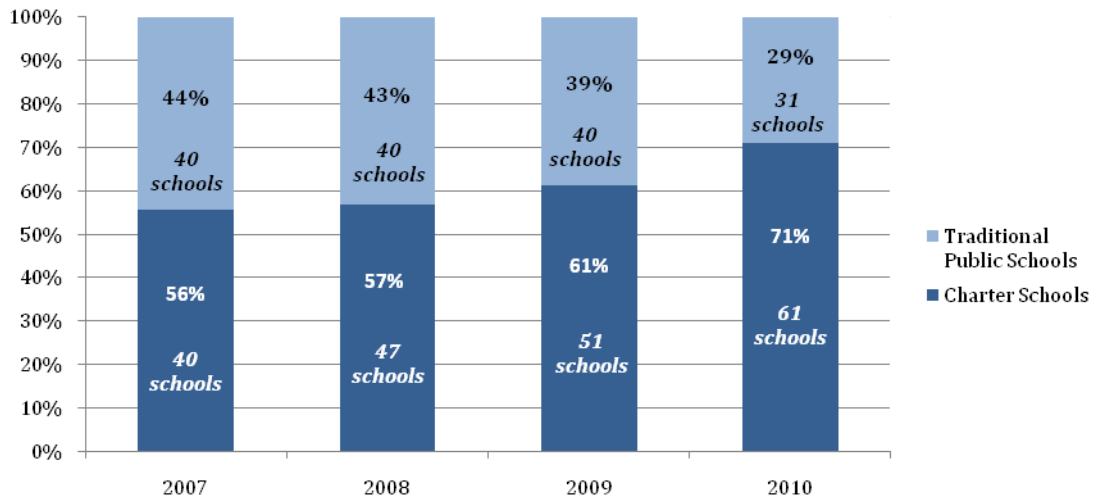

**Public School Enrollment, 2006-2010**

## Charter School Enrollment

While growth in overall enrollment seems to be stabilizing, the percentage of total students enrolled in charter schools has continuously risen. There was a particularly large jump in charter enrollment this year, with over 70 percent of students attending charter schools in October 2010, compared to 61 percent in October 2009. This was due largely to the significant number of formerly RSD-operated schools (six schools) that were converted to charters this school year. New Orleans continues to have a larger percentage of its public school students attending charter schools than any other city or district in the nation. The graph below shows the change in the percentage of students attending public charter and traditional schools from 2007 to 2010.

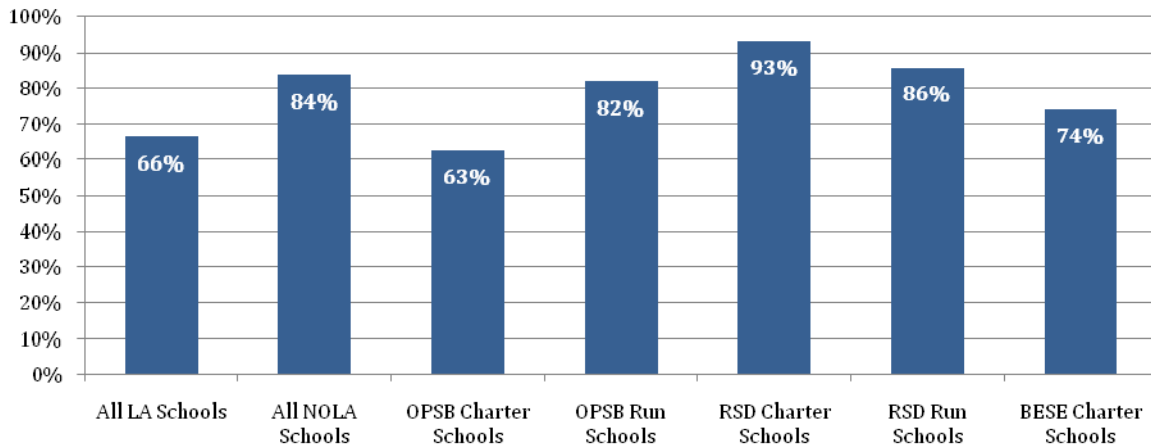

**Percentage of Students Enrolled in Charter and Traditional Schools, 2007-2010**

## Free and Reduced-Priced Lunch Eligibility

The proportion of students eligible for free or reduced-priced lunch, a rough measure of students from low-income families, increased slightly in 2010 to 84 percent of the total student population. This remains well above the Louisiana average of 66 percent. On average, charter schools and traditionally operated schools currently serve similar percentages of low-income students. However, there was significant variation in the percentage of low-income students being served among the different types of charter schools, following the pattern of previous years. The Type 5 charter schools, which are authorized by the state Board of Elementary and Secondary Education (BESE) and under the auspices of the Recovery School District, enroll a much higher percentage of low-income students than those authorized by the Orleans Parish School Board (OPSB) and the Type 2 charters that are authorized by BESE. The graph below shows the percentage of low-income students enrolled in the various types of schools in 2010.

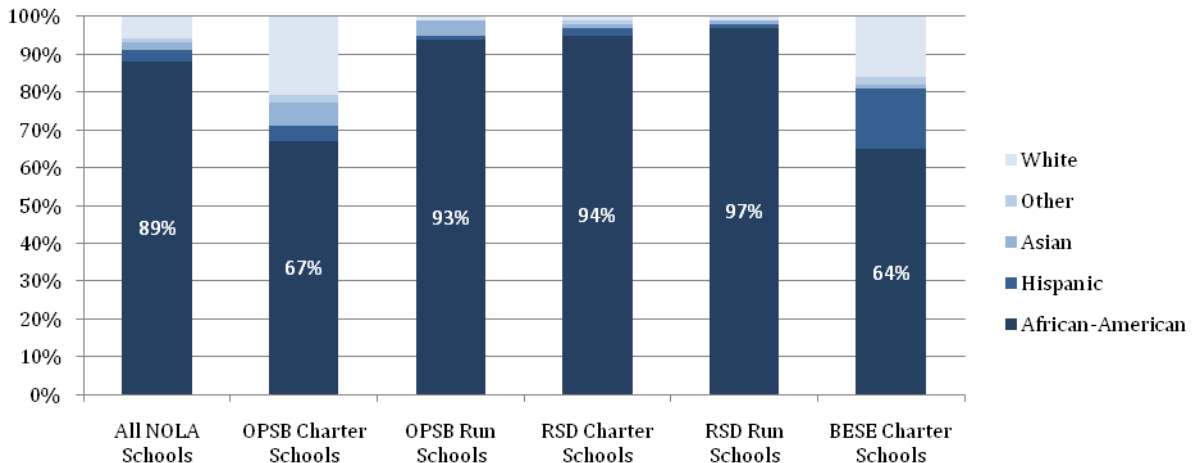

**Free and Reduced-Price Lunch Eligibility by School Type, October 2010**

## Race/Ethnicity

As in previous years, nearly 90 percent of students enrolled in public schools in New Orleans are African-American. This does not reflect the city's population as a whole, which, according to the 2008 Census data, is about 60 percent African-American. Additionally, the percentage of black or minority students varies by school type. OPSB charter schools and Type 2 charters overseen by BESE enroll a smaller percentage of African-Americans than do the other types of schools, though African-Americans still make up the majority of their students. The graph below shows the percentage of students in each type of school by race or ethnicity.

**Race/Ethnicity by School Type, October 2010**

## Appendix: Enrollment, Free & Reduced Lunch, & Race/Ethnicity by School
